Liquid Pension Fund will be available to the Policyholder only through STP or Life Stage Portfolio Strategy as per the rule defined below. Investment objective of Liquid Fund is as under:

Fund	Investment objective	Asset Allocation	Risk Profile
Liquid Pension Fund (SFIN:ULIF023181224LIQUIDFP EN140)	To generate steady return at lower risk by investing in a range of short-term debt/liquid money market securities	T-Bill/Money Market instruments/Cash: 100%	Low

In addition to the above fund an additional fund will be maintained for discontinued policies with the following asset allocation and SFIN.

Fund	Investment objectives	Asset Allocation	Risk Profile

● Systematic Transfer Plan (STP)

With STP, you can invest a specific amount at monthly intervals, this gives you the advantage of Rupee Cost Averaging. You can buy more units when markets are down and fewer units when markets are up, thereby reducing the average unit purchase cost

You can choose STP only for 12 months, this option would be available to policies wherein the premium is to be paid annually.

● How STP Works

While applying for the policy, you choose the amount to be invested regularly in one or more of the Six funds mentioned above, and decide the proportion of money you would like to invest in each fund. If you opt for more than one fund, the minimum investment in any fund should be at least 1% of the Annualized premium paid.

In the case of STP, the Annualized premium (net of allocation charges) will be first allocated to Liquid Pension Fund every policy year till completion of the premium payment term, and then at the beginning of each policy month (monthly policy anniversary), a portion will be systematically switched to the funds chosen by the policyholder at inception. Every month $1/N$ of units will be transferred from Liquid Pension Fund to other funds as per the fund allocation proportion selected by the policyholder, where N = number of months remaining under the STP scheme. STP option is not applicable where the mode of premium payment is Non Annual.

For example: a policyholder chooses the STP option with premium allocation of 20% in Pension Debt Fund and 80% in Pramerica Pinnacle Growth Pension Fund. Then for the first month $1/12 * 20\%$ of units in Liquid Pension Fund will be switched to Pension Debt Fund and $1/12 * 80\%$ of units in Liquid Pension Fund will be switched to Pramerica Pinnacle Growth Pension Fund. This transfer will be processed after the deduction of all the charges for that monthly policy anniversary. For second month $1/11 * 20\%$ of units in Liquid Pension fund will be switched to Pension Debt Fund and $1/11 * 80\%$ of units in Liquid Pension Fund will be switched to Pramerica Pinnacle Growth Pension Fund and this process will be repeated each policy year.

Life Stage Portfolio Strategy

Considering the ever-changing financial needs as per the different life milestones, we offer a life-stage based investment strategy wherein the investments are distributed between Pension Dynamic Equity Fund and Pension Debt Fund with their proportions varying as per the different life stages. At inception the funds will be distributed between two funds, Pension Dynamic Equity Fund & Pension Debt Fund. As and when the next milestone is achieved, the funds will be re-distributed according to the attained age (age bands) as given in the following table:

Every quarter, the strategy shall be reviewed and rebalanced, if necessary, to achieve above proportions. The rebalancing will be done on the first day of each quarter of the financial year except for the last 12 months of the policy. If the first day is a non-valuation date then the next working day's NAV will be applicable.

Age as on Last Birthday Last Policy Anniversary	Pension Debt Fund	Pension Dynamic Equity Fund
Up to 25	15%	85%
26 – 30	20%	80%
31 – 35	25%	75%
36 – 40	30%	70%
41 – 45	40%	60%
46 – 50	50%	50%
51 – 55	60%	40%

2. The Company specifies that, in the event of certain Force Majeure conditions, the declaration of NAV on a day-to-day basis may be deferred and could include other actions as a part of investment strategy (e.g. taking exposure of any Segregated Fund (SFIN) upto 100% in Money Market Instruments [as defined under Schedule III (Part I)(1)(8) of IRDAI (Actuarial, Finance & Investment functions of Insurers) Regulations 2024]

The exposure of the fund as per the fund mandates shall be reinstated within reasonable timelines once the Force Majeure situation ends
6. Few examples of circumstances as mentioned [in point 3 & 4 above] are:
 - a) When one or more stock exchanges which provide a basis for valuation of the assets of the fund are closed otherwise than for ordinary holidays.

- b). When, as a result of political, economic, monetary or any circumstances which are not in the control of the Company, the disposal of the assets of the fund would be detrimental to the interests of the continuing Policyholders.
 - c). In the event of natural calamities, strikes, war, civil unrest, riots and bandhs.
 - d). In the event of any Force Majeure or disaster that affects the normal functioning of the Company.
