- Persistency Units: The Company will add persistency units to your unit account at the end of every 5th year starting from 10th policy anniversary provided they fall within the policy term.
- Avail the option to invest specific amounts at monthly intervals through our '**Systematic Transfer Plan**'.

How does the plan work?

- Choose a policy term from 10, 15, 20 or 25 years, subject to the minimum maturity age of 18 years and maximum maturity age of 75 years.

Benefits in Detail

On maturity, fund value including the value of persistency units will become payable.

Benefit on Death

Systematic Transfer Plan (STP)

On one hand, while investing in an equity-oriented fund provides you the potential of obtaining returns in excess of inflation and an opportunity to create wealth, the unpredictability of equity returns can be unpleasant, especially in turbulent markets. On the other hand, investing in a debt-oriented fund assures you of stable returns, but you lose the opportunity of creating substantial amount of wealth by obtaining returns that beat inflation.

We bring to you the best of both the worlds – the Systematic Transfer Plan (STP). With STP, you can invest a specific amount in a regular fashion at monthly intervals. This gives you the advantage of rupee cost averaging. You buy more units when markets are down and fewer units when markets are up, thereby reducing the average cost of purchase of units in the funds selected by you.

How STP works

While applying for the policy, you choose the amount to be invested in a regular fashion in one or more of the nine funds mentioned above, and decide the proportion of money you would like to invest in each fund. If you are opting for more than one fund, the minimum investment in any fund should be at least 10% of the Single premium paid. Apart from choosing the amount, the Policyholder also needs to choose the duration/ period over which he/she would like to avail STP from the available options of 6 or 12 months.

The single premium will be allocated to the Liquid Fund for STP after deduction of premium allocation charges. At the beginning of each month during the STP period, $1/N$ times the remaining units in the Liquid Fund will be transferred to the funds chosen by you after deduction of all charges for that month (where N is the number of months remaining under the STP).

For example, if you select the STP period as 12 months, then at the start of first month $1/12$ times the remaining units in the Liquid Fund will be transferred to the chosen funds after deduction of all charges for first month. At the start of second month, $1/11$ times the remaining units in the Liquid Fund will be transferred to the chosen funds after deduction of all charges for the second month, and so on till the end of STP period. Under STP, no switching charge will be levied for switching from liquid fund to other Funds. Also, if STP is opted, no special request for switching from the liquid fund will be entertained.

Flexibilities available in the plan

• Settlement option at maturity

Upon Maturity of the policy, you will have the option, to receive maturity benefit as a structured payout over a period of up to 5 years post maturity by availing settlement option.

- During the period the inherent risk in the underlying investment funds will be borne by the policyholder.
- The frequency of the periodic payments during settlement option can be annually, semi-annually, quarterly or monthly.
- The period of settlement shall not in any case be extended beyond a period of five years from the date of maturity.
- The payments will be made in installments, based on settlement period and frequency of payouts chosen, with the first installment payable on the date of maturity.
- You have an option to switch the funds during the Settlement Period.
- In the settlement period after maturity, the risk cover shall be maintained at 105% of the total premiums paid. Accordingly, mortality charges will be deducted.
- The charges levied on the fund during settlement period are the fund management charges, switching charge, and mortality charge, if any and no other charges shall be levied.
- No partial withdrawals are allowed during the settlement period. However, the policyholder can take complete withdrawal at any time during the settlement period and no charge will be levied for such withdrawal.
- The policy will terminate once the fund value falls below a minimum amount of ₹5,000 during settlement period or at the end of settlement period by paying fund value at that time.

• Switching option

You can switch your investments within funds, depending on your financial priorities and investment decision. In a policy year, four switches are available at no cost. Thereafter, each subsequent switch will be charged at ₹250. The minimum fund switch cost is ₹5,000 unless 100% of the fund is switched.

• Partial withdrawals

To manage any unexpected need for money or for any exigency, partial withdrawals can be made from your investment account only after 5 Policy Years (Lock-in Period). Such withdrawals can be made 5 times during the entire term of the Policy. For policies where life insured is a minor, partial withdrawal is not allowed until the minor life insured attains majority i.e. on or after the attainment of age 18. The minimum withdrawal amount is ₹10,000.

The total amount of partial withdrawals in a policy year cannot exceed 20% of the single premium. After making a partial withdrawal, the policyholder has to wait for two years to avail next partial withdrawal.

The partial withdrawals shall not be allowed which would result in termination of a contract.

The partial withdrawals with respect to the fund values from the base premiums shall only be counted for the purpose of adjusting the sum assured to be payable on death.

Let's look at few examples to understand the product benefits better:
